Illovo, Johannesburg, Gauteng

I am an Information Technology graduate with a solid foundation in software development and a strong interest in building practical solutions. As I begin my career, I am focused on gaining real-world experience, improving my professional skills, and learning from experienced teams. I approach my work with a willingness to learn, take feedback seriously, and continuously improve. I am looking for an opportunity where I can develop both technically and professionally while contributing positively to the team.

SKILLS

Backend Development:

ASP.NET Core Web API
ASP.NET MVC
Entity Framework Core
REST APIs
JWT Authentication

Frontend Development:

React
JavaScript
HTML5
CSS
Tailwind CSS

Database Technologies:

SQL Server

Tools and Technologies:

Git
Github
Visual Studio
VS Code

PROJECTS

Hospital Management System

- Developed a Hospital Ward Management System using ASP.Net MVC Architecture
- Implemented core modules for managing patients and staff.
- Designed and integrated database functionality for storing and retrieving medical and administrative data
- Applied separation of concerns by structuring the application into Models, Views and controllers.
- Focused on creating an organized and maintainable codebase following MVC best practices

Learning Management System

- Developed a full-stack Learning Management System using React and ASP.NET Core Web API
- Implemented role-based access control for Admin, Lecturer, and Student functionalities
- Designed and managed relational database structures using SQL Server and Entity Framework Core
- Built RESTful APIs to manage courses, students, lecturers, and modules, including assignment and unassignment functionality
- Created responsive and user-friendly interfaces using React-Bootstrap
- Applied clean architecture principles to improve scalability, maintainability, and code organization
- Implemented dynamic data handling and search-enabled features to enhance usability and user experience
- Followed modern software development practices, including structured project organization, reusable components, and version control using Git/GitHub

Event Management System (B-Creative)

- Developing a full-stack event planning and venue discovery platform for the events and décor industry
- Building features for weddings, corporate functions, conferences, special events, and celebrations
- Designing interactive event planning tools including inspiration boards, theme selection, and venue discovery
- Implementing downloadable planning resources, inquiry systems, and quotation request functionality
- Developing venue registration and management features for venue owners
- Creating testimonial, gallery, and media management systems for dynamic website content
- Building the backend using ASP.NET Core Web API and Entity Framework Core
- Designing and managing a relational database using SQL Server
- Applying scalable system architecture and clean backend design principles

EDUCATION

Muir College Boys High School

2013 - 2021

Uitenhage, Eastern Cape

Nelson Mandela University

Diploma in Information Technology (Software Development)

2022 - 2025; Graduation: April 2026

- Qualification completed – awaiting formal diploma certificate
- Relevant coursework in Software Development and Information Systems

ADDITIONAL INFORMATION

- **Languages:** English, Afrikaans
- Learning .NET MAUI for cross-platform mobile development with a focus on clean coding practices and modern app architecture.
- Applying my skills to building scalable and maintainable full-stack systems and web applications using modern development practices, clean architecture and efficient system design.
- **Industry Exposure:** Job shadowed at Wirk, a software development company, gaining practical insight into real-world software engineering workflows, development practices, and team collaboration
- **Certifications:** Cisco certificate (Introduction to Cyber Security)
- **AWS Technical Essentials** (In Progress)
